Cery's Birds S. D.

1 *Turdus aliciae* 6.60
Above dull olive. Sides head
ash gray. Underparts white.
Breast + throat brown arrow
shaped markings.

2 *Mimocichla ardesiaca* 10.
Gen. plumage plumbeous, a
patch of black extending from
below rim point of eye to base
of up. mandible.
Throat white streaked w. black.
Bill + feet ver. orange.

3 *Mimus dominicus* 8.50
ab. gray brown, underparts white.
Close to M. orpheus.

4. *M. scaria*

5. *Parula americana*

6. *Dendroica tigrina*

7. *D. coerulescens*

8. *D. dominica* 5.10

9. *D. maculosa* 4.50

10. *D. coronata*

11. *D. discolor*

12. *D. palmarum*

13. *D. pinus*

14. *S. aurocapillus*

15. *S. notata* 6

dark olive brown, white superciliary line - white beneath. breast & sides dark cross shaped spots

16. *Geothlypis trichas*

17. *Ligea palustris* 5.50

Crown, nape, upper part of back slaty plumbeous. Rest of back & upper surface of wings & tail yellow green. Throat, breast & sides gray plumbeous. Under

Surf. Tail dull grey.
Taken at Almacén - Guasac.

18 - *S. nivalis*

19. *Certhia vanoniensis* 4.40
♂ up. surface including head, cheeks
wings & tail dull black.
capitulum white stripe.

Throat dark slate. Underparts bright
yellow.

20 *Progne dominicensis* 7.
upper surf. steel blue.
underparts white.

Samana -

21. *Hirundo platensis* 5-

above bright bluish green, no
golden reflex, in some spots.
up. wing & tail tinged w.
pale blue. - underparts white.
H. erythraea from Samana

differ in having up. parts
bright golden green, & lores
blue on head.

La Vega.

22. *Petrochelidon fulva*. 4.70

Throat & sides of breast pale
rufous brown. Belly & crissal
dull white. Top of head bluish
black, also back.
Forehead & nape dark rufous brown.

23. *Vireo olivaceus*. 5.80.

24. *Ouleus dominicus*. 6.20

ab. dark olivaceous. Throat white.
Heavily streaked below. Rump
green. Prim. & Sec. dark brown
edged w. green.
Tail dark brown & tip w. yellow.
Iris orange.

(Cory)

25. *Myiadestes montanus*
upper part & 2 cent. 7. 7"

feathers slaty gray.

Prim. & Sec. brownish black,
showing white near base of inner
webs. Throat, crissum & belly
reddish brown.

Fert Jacques - Haiti. 7.

outer of feather white w. black shaft

26 *Spindalis multicolor* - 6.40.

(Juncoides)

Head black, a supracil. stripe
from forehead to nape white.

a black stripe thru eye to nape -
chin white. throat yellow in middle
rest throat black.

back olive, rump chestnut -
a broad yellow collar on nape.
abdomen & crissum white.

Le Corp & Puente Plate.

27. *Phainopepla palmeriana*

6.70
Top of head & cheeks black - spot of
white each side forehead. Back
mump, I., curved, bright yellowish
green - Iris slaty - Throat
white.

28. *P. dominicensis* (Cory)

Jaeger.

6.80

Front of head black - a
spot of white above eye.
Chin white. Head neck & under
parts gray plumbeous. Back
wings yellow green.

29. *Calyptophilus fragilis* (Cory)

7.00

Top of head brown, shading into ashy.
Upper parts brownish olive.
Throat white, breast white.

plumbeous brownish olive -
Palm. & occ. olive brown.
a patch of bright yellow under
base of wing

Almeria - Yuma River -

30. *Euphonia musica* - 4.40

Crown light blue - Forehead, we-
dark & rump brown orange -
Throat, cheeks, back & T. black
black - Purplish reflex. very
prominent on back -

Frequent high trees -

31. *Phainopepla nitens* - 4.10

Gen. plumage dull olive.
Breast & throat black, wings & T.
olive.

Tortuga name
TáKOK (Tou cock)

32. *P. olivacea* 4.

Ab. dull olive - a superciliary
stripe, a patch on chin, & upper
throat orange yellow.

Underparts. olivaceous gray.
breast black

33. *Lopimantis dominicensis*
Waiti 4.10

Head & throat black. Back & scap-
ulars olive - up. 5. crown yellow.
Crown 5. w. center feathers, on
ter web. of 1st & tips of all
blackish brown. Rest of 5.
bright yellow. Beneath yellow.

34 ~~*Lopimantis*~~

Loricilla violacea 5.80

Entire plumage black. Throat, chin,
ear & crescent over eye pale
reddish brown.

35- *Icterus dominicensis*.
Gin. plumage black. upper
wing coverts, lower $\frac{1}{2}$ back, flanks,
crissum bright yellow. 7.10

36 *Quiscalus niger* 10.25-

37 *Corvus leucognathus*
18

38- *C. solitarius* 15-

39. *Pitangus gabbii* 7.50

Top of head & cheeks dark brown,
feathers concealing patch orange
yellow. Beak brown, becoming
paler towards snout. Wings & T.
brown. Entire under surf. white.

40 *Tyrannus dominicensis*

ab. gray ash, dark red on tail 8.50.
Dull black patch behind eye.
underside whitish, ash on sides of
breast. wings brown. Underwing co-
verts pale yellow. Tail brown.

41. *Myiarchus dominicensis* 6.50

Crown dark olive brown, becoming
lighter on back. Throat & Breast ash.
Belly crissum & under tail coverts
yellow. 2 dull white wing bands.
Two central T. feathers dark brown,
all rest having more than half of
inner web opaque to tip.

42. *Contopus hispaniolensis*

gen-plumage gray olive. 5.50
Feathers of crown edged w. olive.
Throat ash, becoming olive on sides of
breast, & yellow brown on abdomen
& crissum. T. brown.

43. Empidonax naumii 4.30

ab. green olive darker on crown
brighter on rump. I. dark brown.
Throat gray white, breast, abdomen &
under I. coverts pale whitish fulvous.

44. Antrostomus carolinensis.

♂. Latent filaments to bristles 11.
on mouth - Gen. color pale
rufous, mottled w. reddish brown.
crown streaked w. black.

Terminal $\frac{2}{3}$ I. feathers except 4
central ones rufous white.

♀ Looking white on I.
(Pots Plata)

45. Chordeiles minor 8.25

46. Cypselus phoenicurus 3.75

Gen. plumage dull green black.
Throat, rump, abdomen & narrow line
in middle of belly white.

47 *Oreopelia chrysea* 284.

(*Geotrygon martinica*)

Pileum & nape walnut brown, overlaid by metallic green or purple. Hind-neck coppery bronze. Back, scapulars, & lesser wing coverts reddish brown. A broad white stripe passing beneath eye. Chin & throat white passing into pale vinaceous drab on lower neck, chest & breast. Abdomen buffy white.

48 *Oreopelia montana* 250.

♂ upper parts Chestnut, wings lighter.

A broad stripe of pink cinnamon malar region, beneath bare orbital space, & auric. region. Beneath this a broad stripe of rufous chestnut. Chin & throat pink cinnamon. Fore neck & chest vinaceous fawn, fading into warm buff on under parts.

♀ upper parts light olive brown or deep drab & dark brown olive - paler on head.

Throat & chest dull & deep cinnamon.

49 *Chaempelia passerina afflavida*
160-175

50 *Melospelia asiatica asiatica* 260.

white winged dove.

Forehead fawn color, darker on crown & occiput.

Back, scapulars, & wing coverts deep buffy

brown. Distal wing coverts mostly white,
forming elongated patch from bend of wing to
extremity of greater coverts.

Sides of head & neck, chest, & breast wood brown,
anal region white.

51 *Zenaidura macroura macroura* 240-300.

Tail not more than $\frac{2}{3}$ length of wing.

W. 156 J. 88

52

Zenaidura macroura macroura

287 J. 123 W. 135-

53 *Coccyzus americanus americanus*
yellow billed cuckoo 290
~~Stripped with ashy diff from color of head.~~

54 *Coccyzus minor maynardi*
Under parts much paler, only buffy
posteriorly.

55 *Coccyzus minor hesioetes* 291.
Underparts deeply colored. buffy heavy band.

56
Heterosorus rufifularis. 420.
Above, sides of head much, & sides of
chest pale olive gray. Prim. deep chest-
nut or bay. Chin, throat, chest, breast
& upper abdomen uniform chestnut or
bay. Abdomen, flanks, & thighs light
obscure tawny, fading into pale
buff on under tail coverts.
T. mostly black. tipped white.

Bill slender, deeper, thicker, & more
decurved.

57 *Sauvotere Iominicensis* 390.

Bill longer, more slender & straighter.
Above plain soft smoke gray.

Ears, neck, fore neck, chest, & upper
breast pale smoke gray.

Chin, throat & under region deep buff.

Lower breast, abdomen, flanks, thighs,
plain ochraceous buff.

58 *Crotophaga ani* 328.

59 *Aratinga Chloroptera chloroptera*
300

60 *Amazona ventralis* 290

(Swifts)

61. *Nephelocetes niger* 6

Entire plumage dark brown, slight
greenish reflections when held to light.
Forehead slightly washed w. white.

62 *Melospiza miniata* 2.70

63 *Sporadus elegans* 4

64 *Tamias roseicaetes* 11

65. *Ceryle alcyon*

66 *Todus subulatus* 4.35
width bill at middle .20

67 *T. angustirostris* 4
width bill at middle .12

68 *Picus lawrencei* 5.10

69. *Centurus striatus* 9.

70. *Strip glaucops* 13.50

Gen. plumage dark brown, shading
into orange rufous on sides of neck.
Face deep gray. ante orbital spot of
black. Circle of feathers around

face deep chestnut.

Tarsus not feathered to feet.

71. *Spectylo Curculioria* ♂.

72. *Accipiter formicillatus* 11.50
paler than *A. fuscus*.
W. 7 T. 5.50

73. *Rupornia ridgwayi* ♂ 13.75
♀ 14.50

♂ Ab. slaty brown. Shaft of feathers
of head upper back dark brown.
Underparts slaty, faintly marked w.
rufous on belly & abdomen. Chin
dull white. Shoulders & thighs rufous
& faintly pencilled w. indistinct pale
lines. Wings & T. dark brown, bordered
w. dull white. W. 9.15 T. 6.

♀ Top of head & most brownish cast,
becoming darker on back. Feathers
of back & tertaries edged rufous.

Underparts dark rufous. Feathers
narrowly banded w. white. Thighs
showing rufous much brighter.
Feathers banded w. very fine lines.
Crissum white. Underparts of breast
slaty shading into dull white on
throat.

W. 10 T. 6.45-

74. *Falco columbarius* 11.

W. 7.50 T. 5-

75. *F. sparverius isabellinus*.

10 W. 7 T. 5-

76. *Pandion haliaetus*

77. *Columba leucocephala*.

12.50

ab. gray blue. Crown pure white.
bordered at nape by band of dark purple.
& below it on each side of neck, a
cape of metallic green.

Quills dark brown, lighter on
secondaries. Underparts gray blue.
Orissem plumbeous. Tail dark brown.

78. *Columba inornata* 14.50

Head, neck, & underparts W. 8.50
& some wing coverts dull purple.
rest of plumage slaty.
Edges of outer webs of some wing
coverts white, distinctly mottling
wing.

79. *Columba coromanda* 13.50

Gen. plumage slaty. W. 7.50
Top of head, throat, & breast pale purple.
A broad cape of beautifully mottled
feathers from sides of neck over
upper back showing bright rose-
latic purple when held to light.

80. *Oxyechus virgatus* 8.50

81. *Oedimemno dominicensis*
Pop. name "Boukera" 14.50

82. *Aegialitis vociferus* 10

83. *Ac. Wilsonius* 7.45

84. *Ac. semipalmatus* 6.75

85. *Haimetopus palliatus* 17.40

86. *Himantopus mexicanus*
13.50

87. *Tringoides macularius* 7.10

88. *Endocismus albus* 23.50

89. *Ardea rufa* 29.

90. *A. candidissima* 22

91. *A. coerulescens* 23.

92. *A. virescens* 16

93. *Arannus pictus* 25

94 *Parra gymnostoma* 9

95 *Galinula galeata* 13

96 *G. martinica* 11.

97. *Fulica americana* 14.75

98. *Phoenicopterus ruber*.

99. *Dendrocygna arbores* 21..

Head w. black band on crown, W. 11.25

continuing in narrow stripes to nape.

Forehead soon eye reddish brown, shading
into dull white on throat, & mottled
brown & white on sides head & neck.

Breast & upper part brown & the
feathers broadly edged w. fawn.

Rump & tail black. Underparts brownish
white heavily spotted & banded upon
sides. Spots small & faint on
abdomen.

100 *Dafila bahamensis* 19.
Gen. plumage, tawny W. 8.
marked & streaked w. brown W.
Vented w. lustrous green Black stony
Top of head & neck brown finely
marked w. dark brown. Rest of
head & neck white. A triangular
dark patch on each side of upper
mandible base and. T. tawny, be-
coming pale at tip.

101. *Querquedula discors*.

102 *Sula cyanops*

103 *S. leucogaster*

104 *Pelecanus fuscus*

105. *Tachypetis aquilus*

106 *Phaethon flaviventris*.

107 Wood Duck

62. A. *Lamprolaima dominica*

Entire upper parts yellow green. ^{4.90}

Throat bright golden green. Breast &
belly purple black. Flanks green
showing spot of white. Under 7.
feathers violet purple. Median feathers
then bronze green.

Sporadus ~~ricordi~~ elegans

Forked tail
(*Ricordia swainsoni*)

Samana name for *Solenodon*?
(hooron) juron (huoron)

Santa Rosa got such a mounted
skull - 14 - 15 inches long in possession
of a druggist (Dr. Delgado)
at Puerto Plata.
said to be from mountains & called
locally ~~the~~ Juan - or Don Juan.

Go to San Lorenzo, Samana B.
Gabb stood in caves here -

Cape Macao, I. C. Engand
Gives W. M. place & S. L. one 1.

Yellow crowned night heron, near
Samana + Port de Paix - scaly necked
Patagionas Squamosa Pigeon.
L. 366 w. 208 J. 137

H. & upper neck all around & chest plain
dark purple drab & vinaceous slate; nape
rich dark purple brown, forming a crescentic
or shield shaped patch. Hind neck metallic
dull purplish changing to bluish green &
violet, the feathers sharply margined
w. rich dark purple brown, producing
squamate effect. Rest plumage pale
slate, darker on primaries & tail, pa-
ler below. This shading gradually into the
purple drab of breast.

B. like red, white or yellowish at tip.
His inner ring scarlet & center of yellow.
Bare orbits space dull red.

Bot nets too big turned out
32 amp. barrel / could shoot
32 shot cartridges.

108 Oria

109 Brachyopsis

110 Loxia

~~Poncho~~ Streptopelia risoria

Ring clasp - throat well lined.

272 - W. 161 - J 112

several days off mouth of
Yuma R. abt. Feb. 15th 19

Nesting of *Amazona Ventralis*
Laguna, near Samaná. S.D.

Mar. 5. 1919.

Nest was in a hollow "Vervain" tree
The tree half dead stood in a clearing
100 yds fr. house & some fr. edge of woods.
The tree was hollow throughout, but the
lower 1/2 of hollow was filled with dirt
& debris. The entrance hole was abt.
22 feet fr. ground, but the ~~bottom~~ nesting
on the dirt at bottom was abt. 15
ft. from ground. There were 2 yg. birds
~~entirely~~ mottled except for pin feathers.
apparently 3 weeks old.
The hollow in tree was abt. 9" in diam.

Egg of *Tyto glaucops*. May 28th 19.
brod. by John King in hollow palm
tree. 20' fr. ground.

Progne dominicensis &
Petrochelidon fulva (most numerous)
were nesting or building in the
rocky islets on S. side of San Juan
Bay Mar 21st. - These about did
not have testicles ^{very} much enlarged, &
no eggs could be found in the
few nests accessible. - Probably
but just had as yet laid eggs.

Anas dominicensis still nest
building at Cayo Hondo, Mar. 20th.

Pelicans not yet ~~the~~ nesting.

Columba v. n. n. apparently
nesting in mangroves - San Juan Bay
cross not yet nesting.

Columba ~~capensis~~ apparently
nesting at Laguna.

Oreomastix dominicensis? a few
small ducks possibly this species
were seen at Laguna de diablo.
3 hrs. from Laguna. March. 12th
They kept in middle of lake, out of
range of water lot deep & wide.

Constanza.

Apr. 11. A boy took me a pair
of young Sparrows ~~hatched~~
fully plucked, nearly ready to
fly. - He said he found them in
an old woodpecker hole,
12 ft. fr. ground in a large tree.

Apr. 7th a community of Sigas
(*Anas*) abt. 6 pairs, or
nesting in the top of a large
live pine abt. 80-90 ft. fr.
ground. on outskirts of
Village (Constanza). - Nest
is abt. twice as big as a ~~common~~

Pine Warbler 1919.

a ♀ shot at El Rio on
May 13 had eggs almost ready
for laying (nest day).

Shot in pine forest on Road to
Opatabacon.

Pair *Corvus solitarius* shot at
Cruztonza Apr 7th. Had completed nest
in pine tree 35 ft. from ground. No
eggs.

Other crows seen during next few days
were still nest building.

Dulus Iona. Seen flying with sticks
for nest at Sanchez. June 4th 19.

Corvus leucognathus
common at Port Rincon N. shore
Samana peninsula. Aug. 1919.
Maybe 100 pairs in that neighbor-
hood. very noisy - easily called up
& not shy.
Some seen at Lajana 2 miles
eastward of Rincon.

Dafila acuta
Major of Marines
said he shot a number of these
the present winter 1919-1920.
near Port au Prince

Contents of stomach of
Plegadis garrana
Lake Enriquillo - Oct. 3 - 19.
Contained small bivalves, & other
shells.

Birds observed at Catalinita Id.
Sep. 10 - 12 - 1919.

Pelicans breeding on N. end.
maybe 100 nests. Young still
unable to fly.

Barn Swallows numerous flying
south.

2 or 3 pairs Gray King birds

2 or 3 Kingfishers

Fish hawks several.

Many *Larus atricollis*

Saona Id. San Dom.
Sep. 12th - 18th 1919

Gray Kingbirds common

small cuckoo several seen

Loquax virens ???

several seen, white belly -

black throat

Sterna fuscata

Royal tern

brown booby.

frigates.

Buteo borealis several seen

Nesting place of *Aratinga*
chloroptera near Fond's Parisien
on shore of Etang Saumatre
May 17th 1920

Two dead fan palm trees were occupied
about 70 feet high in a grove of fan
palms about 1 1/2 miles west of Fond's
Parisien.

about 20 ^{holes} nests seen in one
tree + 13 in the other - nearly all occu-
pied. The nests were the enlarged
nest holes of *Chrysomitris striata* -
which species still occupied a hole in
real palm.

I cut down the tree with 13 ^{nest} holes - ^{the ground} ~~the~~ ^{it}
broken in several pieces in falling.
One young dead parrot was in one hole.
Killed by the fall. + the hatched egg shell
in same hole. The other nest holes
were empty.

The tree was pretty rotten, + the lowest
side a mere shell.

The nest holes all had a mass of fine
chips at bottom.

The birds were nesting vigorously, + were

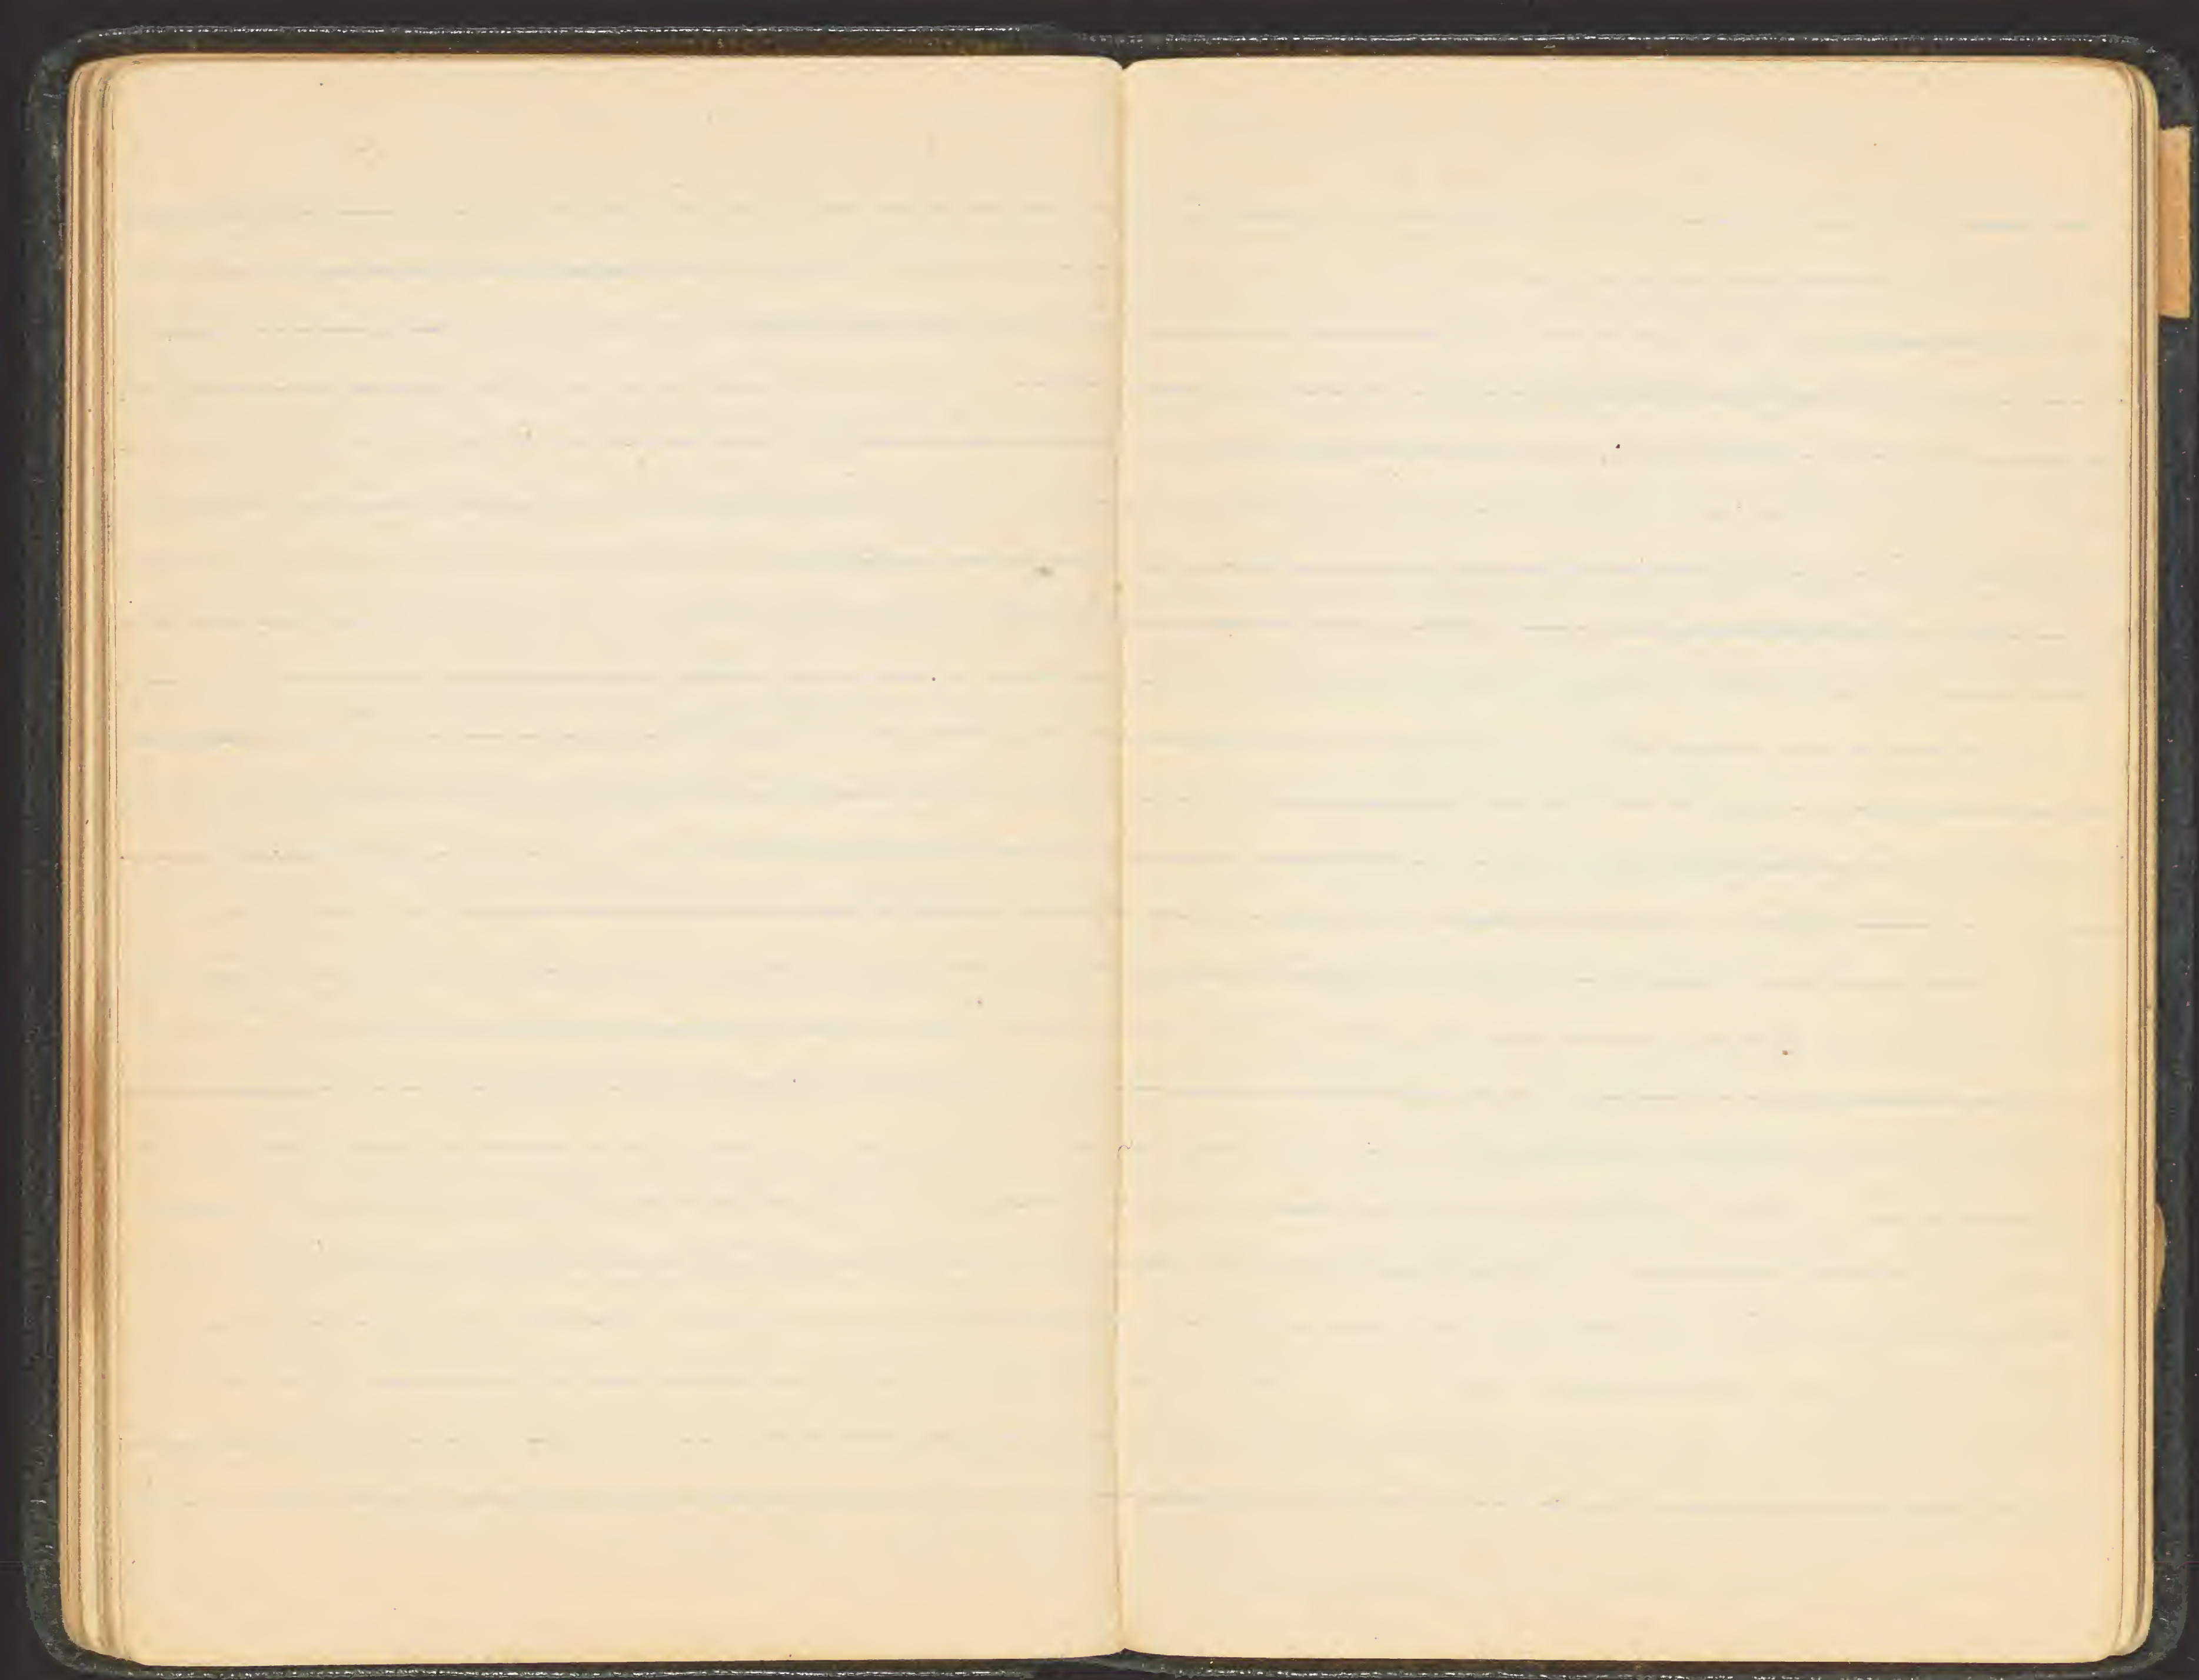

~~making signs~~^{or} every time, allowing
approach within 2 or 3 yards.

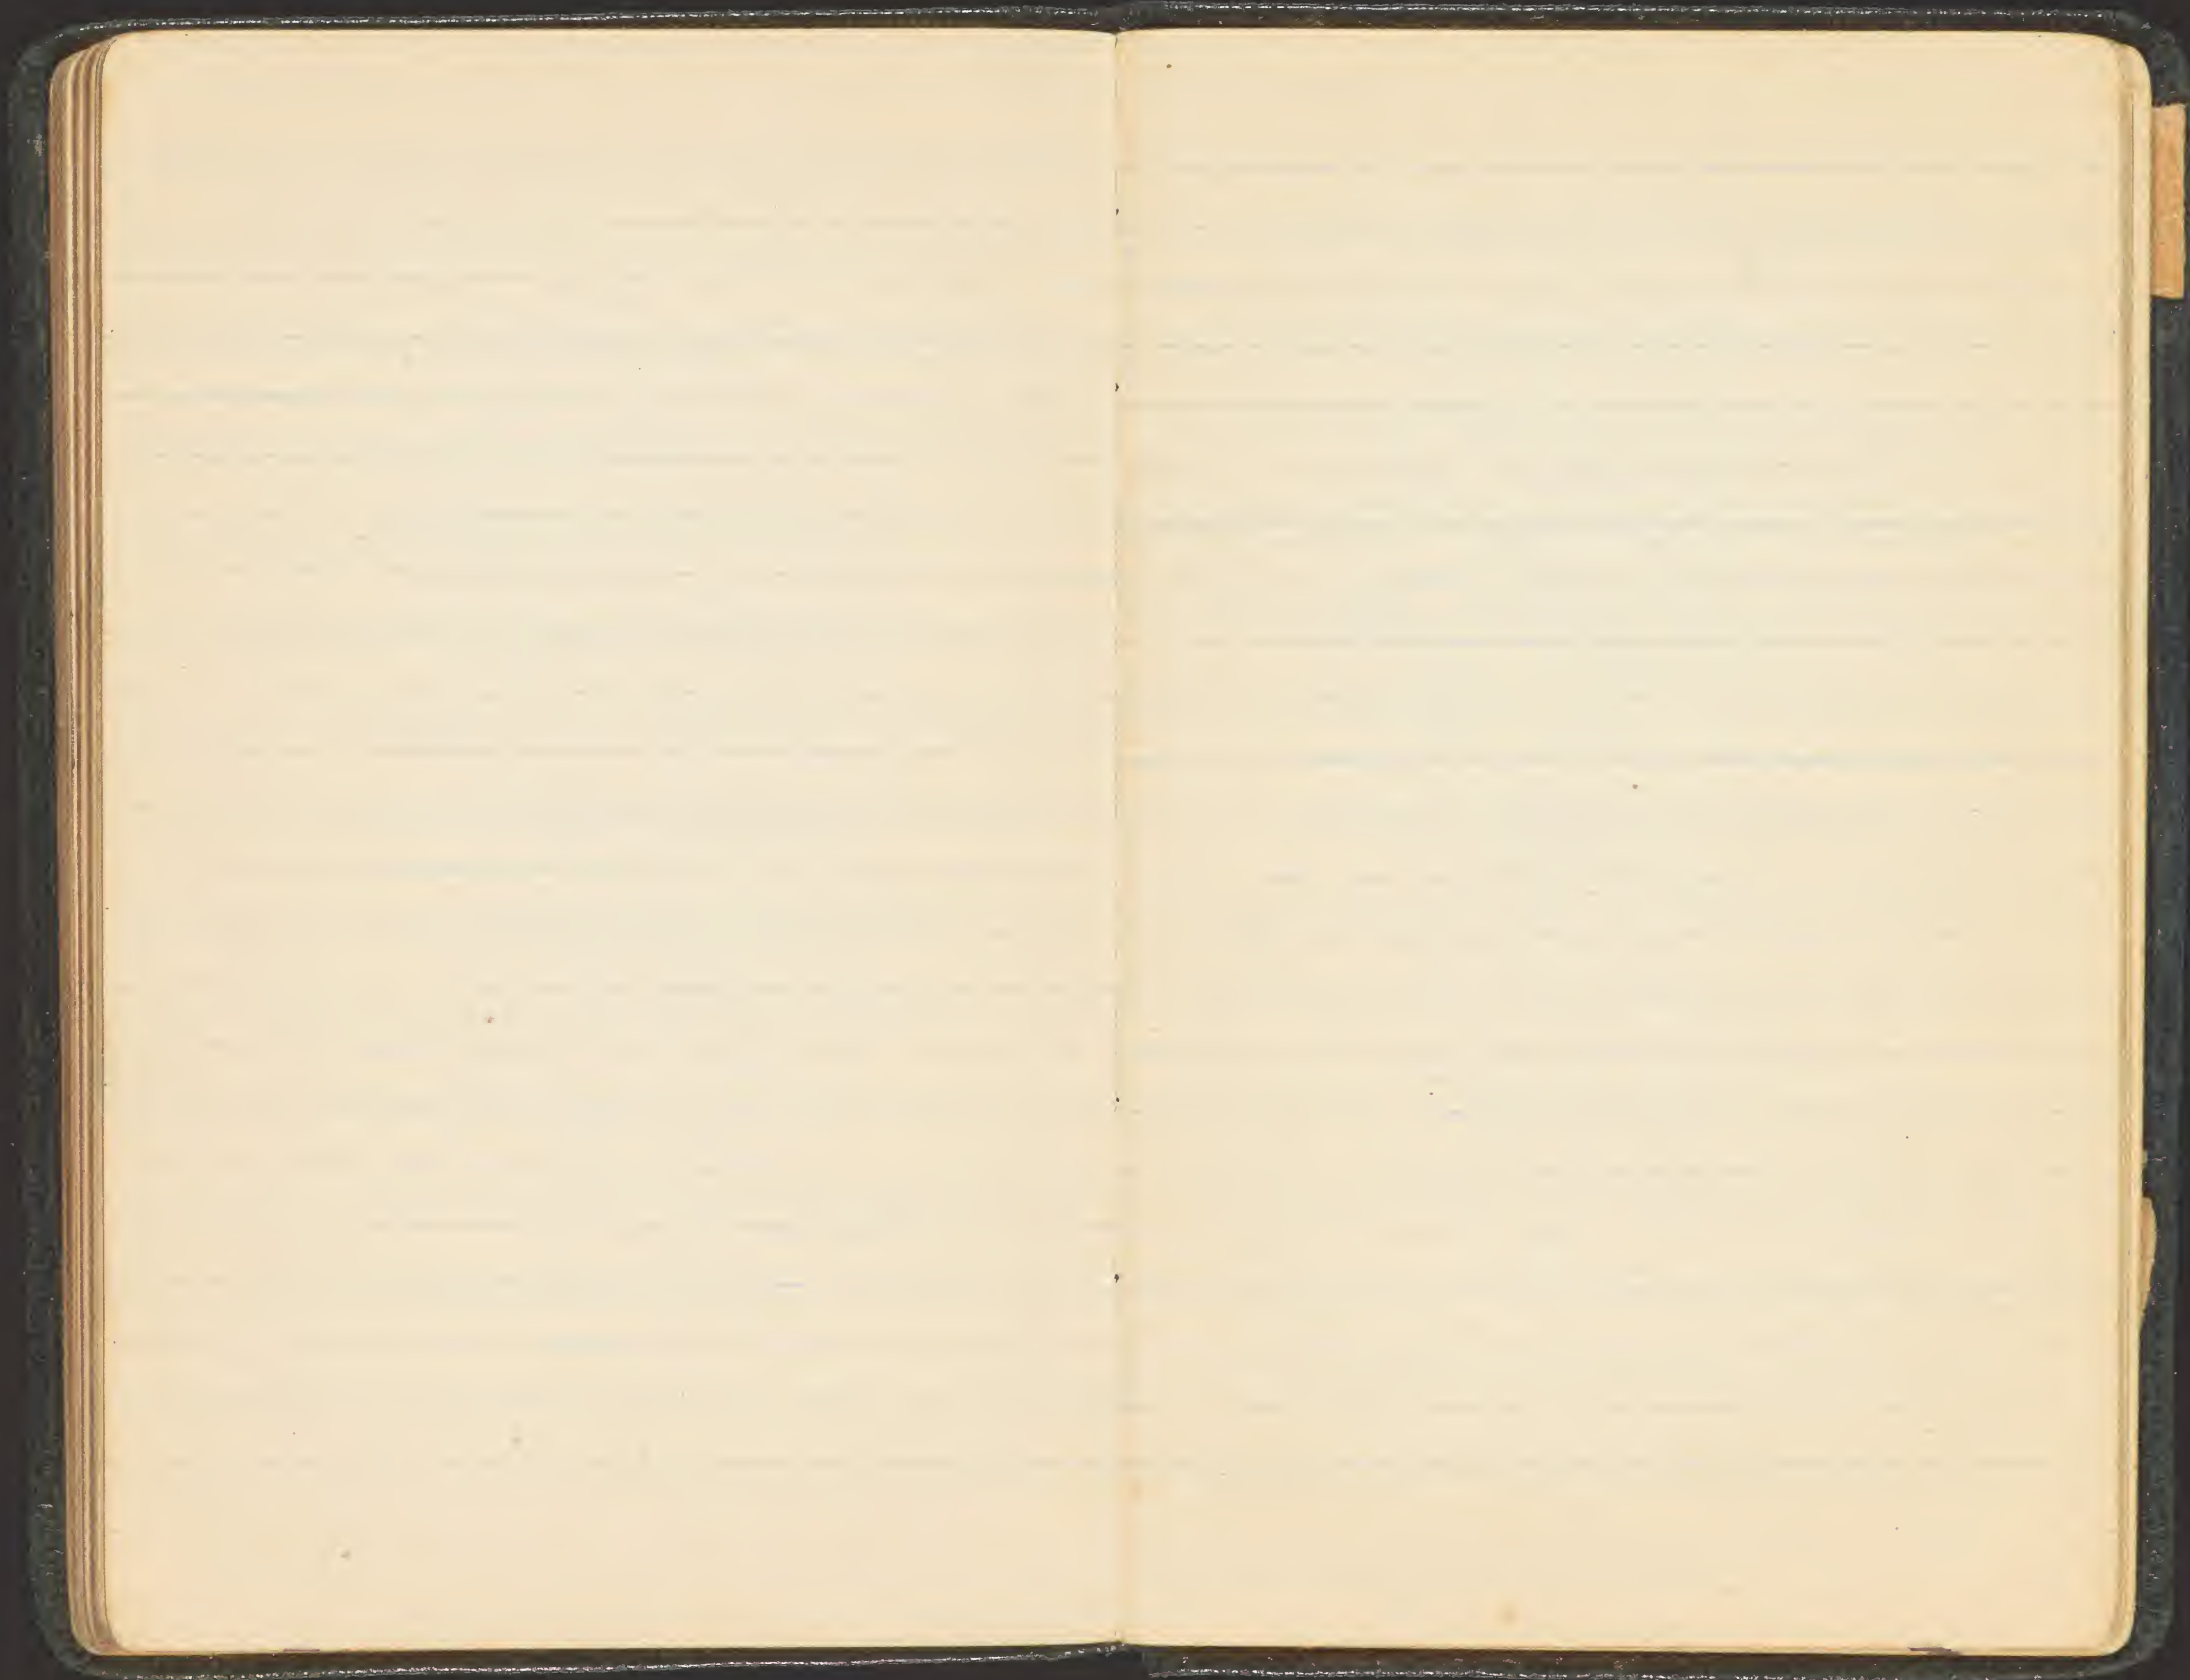

Dulus dominicensis nesting
at Furey (circ. 1000 m)

May - 1920

making small nests - 1 foot (circ.)
in diam. of pine needles in
tall pine trees - instead of the
usual high community nests of
this species.

also at Fond's Vaudette (Mission)
a big nest seen in a tall pine.
one tree at Furey had 4 of these
smaller nests - each apparently
occupied by 2 pairs.

Left at Sanchez - June 6-19.
